REAR HUB SEAL DRIVER - Use this tool to help you install the grease seal #1560 to the correct depth for the snap ring installation. Tool only no seal.
1560T 28-31 \$19.95ea.

FRONT HUB INNER & OUTER RACE INSTALLATION TOOL - Use this tool to easily install both the inner and outer race into the front hub without damaging the race surface. Hub and races are sold separately.
1771 28-31 \$36.95ea.

SPOKE STRAIGHTENING TOOL - Use this tool to help straighten the bent spokes on your wheels.
2360 28-31 \$119.00ea.

BRAKE SHOE CENTERING TOOL - Mount this tool on either the front spindle or the rear axle to help center the shoes on the backing plate. By centering the shoes on the backing plate you assure complete contact of the shoe to the drum. Detailed instructions included.
2695 28-31 \$39.95ea.

BRAKE LINING RIVET TOOL - Enables you to remove old rivets and install new rivets in brake lining. Tool clamps in your vise. These tool are hardened to last longer.
2710 28-48 \$23.95ea.

TOOLS ONLY FOR 2710 BRAKE LINING RIVET TOOL - These are the four hardened tools sold separate from the anvil (#2710).
2711 28-48 \$10.75set

FRONT BRAKE LEVER SHAFT BUSHING REAMER - This .559 reamer is fluted 13 inches long to reach both bushings in one operation. Custom made for the Brake Shaft for us in Canada.
3050 28-34 \$133.00ea.

BUSHING REAMER FOR REAR BRAKE CAMSHAFT AND EMERGENCY TOGGLE LEVER BUSHINGS - This .688 reamer is fluted 5 inches long to reach both bushings in one operation. Custom made for these applications for us in Canada.
3101 28-34 \$69.95ea.

DRILL BIT TO REAM SPRING SHACKLE BUSHINGS - This is a 14.5 millimeter drill bit with a 1/2" shank. Bushings included with shackle kits do NOT need to be reamed, but other suppliers may.
4280 28-31 \$18.50ea.

FRONT SPINDLE BOLT BUSHING REAMER - This .814 reamer is fluted to reach both bushings in one operation. Custom made for us in Canada.
4360 28-41 \$149.95ea.

STEERING WHEEL REMOVAL TOOL - This tool has two plates so it can be used on 28-29 & 30-31 steering wheels. Removes the wheel from the shaft without damaging it.
5705 28-31 \$42.50ea.

PROTRUDING RING STYLE

1928 TO 1941
6150

RECESS RING STYLE

1928 TO 4/15/29
6150

4/15/29 TO END
6160

REAR WHEEL HUB PULLER - Opening in base of puller hooks into or around the groove or ring on hub. One inch thick bolt at end of puller must be tightened down against axle, made form strong ductile iron. A copy of an early aftermarket puller.
Protruding hub ring style
6150 28-31 \$31.85ea.
Recess hub ring style
6160 28-31 \$31.85ea.

TORQUE TUBE BEARING & RACE REMOVAL TOOL - Screw this tool onto a 5' length of pipe (not included) and then you have a tool to remove the seal, roller bearing, and sleeve. Seat the tool into the seal from the banjo end and tap the pipe with a hammer. The seal, roller bearing, and race will all easily come out on the floor.
6451 28-31 \$7.50ea.

REAR SPRING SPREADER - The BEST made rear spring spreader we've used. Includes a bearing at each threaded end for easy turning to open spring. Can be used for both Model A & T FORDS.
7430 28-31 \$145.00ea.

DISTRIBUTOR CAM WRENCH - An indispensable timing tool used to hold the cam in place while tightening the cam screw.
17500 28-32 \$1.00ea.

BROKEN HEAD STUD DRILL OUT TOOL - This is a high quality set consisting of 10 pieces that are needed to drill out a broken head stud. Using the 2-locator plates allows you to accurately locate the drilling fixture over the stud that is broken off. Designed by a mechanical engineer for use on his car. Kit includes detailed & illustrated instructions. This kit contains the drill bit, tap and bushings for the standard thread studs.
8235 28-31 \$140.00set

GEAR SHIFT LEVER SPRING REMOVAL & INSTALLATION TOOL - This handy tool compresses the spring to remove the clip holding the spring in place, then carefully relaxes spring. Reverse this operation to install new gear shift and spring. Steel tool is 16" long. Instructions included.
10920 28-31 \$23.05ea.

ADJUSTABLE PEDAL BUSHING REAMER - This reamer will ream both bushings in each pedal or the bushings in the bell housing. Customer must set the reamer to .874 before using.
11200 28-34 \$44.35ea.

WATER PUMP WRENCH - Special wrench to tighten the large packing nut.
12260 28-34 \$1.45ea.

GAS GAUGE TOOL - Two special tools to remove the inner and outer nuts. Steel tools for better fit and strength.
13520 28-31 \$10.80set

IGNITION SPARK AND COIL TESTER - This device uniquely shows ignition spark presence and coil polarity while engine is cranking or running. This thumb sized tool is placed between the ignition coil and distributor. It shows by high intensity flashing lights that spark is present, or spark is not present, or polarity is "right", or polarity is reversed. The Sparkite works with ALL types of spark ignition systems: points, transistor. It indicates properly with 6, 12, volt, positive or negative battery systems. Instructions for use are included. Genuine NUREX.
17140 28-34 \$24.95ea.
